

MATCHING QUALITY STATEMENT

Blue Print - The Parts For Japanese & Korean Cars

Blue Print components, with the exception of remanufactured items*, have been manufactured to meet or exceed the matching quality requirements as specified in the Block Exemption Regulation EC No.1400/2002. The correct installation and use of these parts will not invalidate the vehicle manufacturer's warranty.

The following remanufactured parts are categorised as "**Replacement Spare Parts**".

Alternators

Brake Calipers

Starter Motors

Steering Boxes

Steering Pumps

Turbochargers

Whilst some of these Replacement Spare Parts may be remanufactured or re-specified to improve durability or performance over the original parts, they are not necessarily remanufactured to the same specifications as would be used for the manufacture of new vehicles.

All Blue Print components are warranted to be free from manufacturing defects for a period of 2 years from the date of first fitment, however some parts must be changed at the vehicle manufacturer's specified service intervals.
